

I claim:

1. Apparatus for permitting sanitary egress from a restroom, the restroom including a door having opposite sides, said apparatus comprising:

5 a dispenser mounted on one of the sides of the door, the dispenser being adapted to contain and dispense a supply of sheets to a user prior to exiting the restroom; and

a disposal container assembly mounted on the door, the disposal container assembly being adapted to receive the supply of sheets upon exiting the restroom.

10 2. Apparatus as set forth in claim 1 wherein the disposal container assembly is mounted on the side of the door opposite the dispenser.

15 3. Apparatus as set forth in claim 1 wherein the disposal container assembly is mounted on the same side of the door as the dispenser.

4. Apparatus as set forth in claim 3 wherein the disposal container assembly is mounted on the door below the dispenser.

20 5. Apparatus for permitting sanitary egress through a doorway, said apparatus being adapted to be mounted on a mounting member including opposite sides, said apparatus comprising:

25 a dispenser assembly adapted to contain and dispense a supply of sheets, said dispenser assembly being mounted on one of the opposite sides of the mounting member, and

a disposal assembly adapted to receive the supply of sheets, said disposal assembly mounted on the side of the mounting member opposite the dispenser assembly.

6. Apparatus for permitting sanitary egress from a restroom, said apparatus comprising:

a mounting member including opposite sides and a passage communicating between the opposite sides of the mounting member,
5 a dispenser assembly mounted on the mounting member and including a first housing portion adapted to contain and dispense a supply of sheets, and

a disposal assembly mounted on the mounting member and including a second housing portion defining a container chamber having a portion extending into the passage.

10 7. Apparatus as set forth in claim 6 wherein the dispenser assembly and the disposal assembly are on the same side of the mounting member.

8. Apparatus as set forth in claim 7 wherein the first housing portion
15 includes a first opening located on one side of the mounting member, and wherein the second housing portion includes a second opening located on the side of the mounting member opposite the first opening.

9. Apparatus as set forth in claim 8 wherein the first housing portion
20 includes a removable top.

10. Apparatus as set forth in claim 9 wherein the providing second housing portion includes a for providing access to the second opening.

00886880 062001
100290 0839360

5 a housing adapted to be mounted on the mounting member, the housing
defining an interior space and having a portion extending into the passage in the
mounting member,

10 a member located in the interior space and dividing the interior space into
a dispenser portion communicating with the first opening and adapted to contain a
supply of sheets and into a container portion communicating with the second
opening and adapted to receive the supply of sheets.

13. Apparatus as set forth in claim 11 wherein the portion of the
20 housing extending into the passage includes said second opening.
